

[Test Plan] saucedemo.com version 1.0

Document Status	[DRAFT]
Test Plan Creator	Hafiz Hamdani
Test Plan Reviewer	

1. Introduction

a. Overview Feature to be tested

This Test Plan is created to describe the testing approach for features available on the saucedemo.com website. It aims to ensure that all functionalities (Login, Product Page, Sorting, Cart, and Checkout) work properly and meet user requirements.

This document defines the testing scope, objectives, schedule, risks, and expected deliverables for manual testing.

b. Goals and Objective

The saucedemo.com website simulates an e-commerce platform with features such as a login page, product listing dashboard, shopping cart, and checkout process.

Manual testing will be conducted to validate the following functionalities:

1. **Login** – Verify user authentication using valid and invalid credentials.
2. **Product Page** – Verify product listing, sorting options (A–Z, Z–A, Low–High, High–Low), and product details display correctly.
3. **Cart** – Ensure cart updates when adding/removing items and supports navigation to checkout.
4. **Checkout** – Verify form validation, proper navigation between stages (Information → Overview → Complete), and confirmation messages.
5. **Logout** – Ensure users can log out successfully and return to the login page.

2. Test Item

List of test items (feature / product)

No	Feature	Test Item
#1	Login	1. Login with valid credentials 2. Login with invalid credentials 3. Login with user doesn't exist

#2	Product Page	1. Product title visibility 2. Sorting options (A–Z, Z–A, Low–High, High–Low) 3. Product image and description display
#3	Cart	1. Add to cart 2. Remove item 3. Cart badge update 4. Navigate to checkout
#4	Checkout	1. Validation on empty and invalid data 2. Successful checkout flow 3. Confirmation message
#5	Logout	1. Logout button redirects to login page

3. In Scope Testing

List of in feature to be tested

No	Feature	Requirement / Design specifications
#1	Login	Login functionality must validate user credentials and handle error messages properly
#2	Product Page	Sorting and product detail features should work based on user selection
#3	Cart	Cart updates dynamically based on user interaction
#4	Checkout	Checkout form validation and order confirmation flow
#5	Logout	Session should be terminated properly upon logout

4. Out of Scope Testing

List the features of the software / product which will not be tested.

No	Feature	Reasons
#1	Register	This testing phase will be focus to test login feature
#2	API Testing	Focus is on manual front-end functionality testing

5. Testing Approach

Testing will follow a manual exploratory approach.

The tester explores the system without prior automation scripts to ensure user flows work intuitively and correctly.

Each test case is executed manually and recorded in the test case document.

Defects are logged and tracked in a separate defect report sheet.

Testing follows an Agile sprint structure, where features are validated iteratively based on delivery progress.

6. Test Environment

Information about testing environment that will be used during testing phase e.g URL, and version of App

- Website: <https://www.saucedemo.com/>
- Windows 11, version 24H2
- Browser: Chrome (Latest version)

7. Test Deliverables

- Test Plan (this document itself)
